

MARIA MERCEDES ATIM

Full Stack Developer — Java · Spring Boot · PHP · Laravel · Vue · React

General San Martín, Buenos Aires, Argentina · mariamercedesatim@gmail.com · +54 9 11 3150-9571

linkedin.com/in/mariamercedesatim-dev · github.com/MerAtim · meratim.github.io

PROFESSIONAL SUMMARY

Full stack developer with hands-on experience on real teams, gained through internships in software development, testing and agile coordination. I work on the backend with Java and Spring Boot, and with PHP and Laravel on a production platform; on the frontend with Vue 3 and React. I develop with unit and integration tests, layered architecture and continuous deployment. University Technical Degree in Programming (UTN). English at C1 level. Focused on backend and full stack roles.

TECHNICAL SKILLS

Languages: Java, PHP, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Backend: Spring Boot, Spring Security, Spring Data JPA, Laravel, Eloquent ORM, FastAPI, SQLAlchemy, REST APIs, JWT, Keycloak SSO, Laravel Sanctum, Maven

Frontend: Vue 3 (Composition API), React 18, Vite, Tailwind CSS, Vuetify, Vue Router, Axios

Databases: PostgreSQL, MySQL, MariaDB, MongoDB, Hibernate/JPA, Flyway, versioned migrations

Testing and quality: JUnit, Mockito, Testcontainers, PHPUnit, Vitest, React Testing Library, Playwright, mutation testing (Infection, Stryker), PHPStan, JaCoCo, manual testing and QA

DevOps and deployment: Docker, Docker Compose, GitHub Actions (CI/CD), Render, Vercel, Git, GitHub, Postman, Sentry

Architecture and methodologies: Hexagonal architecture, Clean Architecture, SOLID, Controller-Service-Repository pattern, DTOs, Scrum, Git Flow, code review, Jira

PROFESSIONAL EXPERIENCE

Full Stack Developer (PHP / Vue) — Academia MC

Internship · August 2026 – Present

- Development on a production e-learning platform with Laravel and Vue 3, in a Controller / Service / Repository architecture.
- Found and fixed a time zone bug in a shared component affecting **16 screens** of the admin panel, adding tests that pin the time zone explicitly.
- Detected a risk of data loss in a loading process before it ran in production, reported with the full cause-and-effect analysis.
- Reviewed the technical scope of a two-week sprint: checked the **14 tickets** against the existing codebase and found inconsistencies before the team started.
- Unit and integration tests with PHPUnit against PostgreSQL and Vitest on the frontend; mutation testing scoped to the modified files.
- Ticket-based workflow with one branch per task, pull requests, code review and conventional commits.

Scrum Master, QA and Coordination — Ferretería San Francisco

Corporate website · September 2025 – July 2026

- Led the team as Scrum Master: running meetings, assigning tasks and tracking deliveries.
- Mentored junior developers through their first experience in a professional environment.
- Manual testing and quality control before release.
- Handled the domain purchase and setup through to getting the site live (ferreteriasanfrancisco.com.ar).

Full Stack Developer — Plant shutdown management platform

Oil & gas sector · Final degree project (UTN) · November 2025 – January 2026

- Full stack development of a plant shutdown management platform: **React with TypeScript** on the client and **FastAPI** on the server, with Clean Architecture on both layers.
- Implementation of use cases, domain entities, REST endpoints and **Keycloak SSO** authentication integration.
- **131 commits**, the largest individual contribution on a team of five, with conventional commits and pull request review.
- Final degree project for the University Technical Degree in Programming.

Full Stack Developer — Universidad de La Punta (San Luis), CTRL-Z group

November 2022 – September 2024

- Development of applications for Universidad de La Punta.
- Design of software solutions for medical practices.

FEATURED PROJECTS

MedConnect — Appointment and medical record platform

Java 17, Spring Boot 3.2, Spring Security, PostgreSQL, Flyway, React 18, Docker · github.com/MerAtim/MediConnect

- Hexagonal architecture, with domain, use cases, infrastructure and REST adapters kept separate.
- JWT authentication in an httpOnly cookie and role-based authorisation (Administrator, Doctor, Patient) on every endpoint.
- AES-256-GCM encryption of medical records in the database and versioned migrations with Flyway.
- Integration tests with Testcontainers against real PostgreSQL and CI with GitHub Actions on every push and pull request.

CapyMeal — Personal food diary (PWA)

Vue 3, Vuetify, Laravel 12, PHP 8.4, PostgreSQL, Docker, GitHub Actions, Sentry · github.com/CapyMeal/CapyMeal

- Authentication via httpOnly cross-origin cookie and OAuth2 social login with Google and Microsoft.
- Migrated the session token from localStorage to an httpOnly cookie following a security finding, resolving real Sanctum incompatibilities in a cross-origin architecture.
- Installable PWA with offline support and an Android APK built with Bubblewrap.
- CI/CD with mandatory tests and lint per pull request; production error monitoring with Sentry.

EDUCATION

University Technical Degree in Programming

Universidad Tecnológica Nacional (UTN), Facultad Regional San Rafael · Graduated July 2026 · Diploma in process

Full Stack Java Development (three stages) and Codo a Codo certification

2023 – 2024

Manual Quality Assurance, foundation and advanced levels

2023

Graphic Design (Adobe Photoshop, Adobe Illustrator)

2024

LANGUAGES

Spanish: native.

English: C1 (Common European Framework of Reference). English Discoveries Advanced, Edusoft — an ETS subsidiary, Buenos Aires Ciudad Bilingüe programme, 2025.

ADDITIONAL EXPERIENCE

Customer Service — Ferretería San Francisco

March 2015 – Present

- Customer service, inventory management, supplier coordination, billing and administrative support.
